Android Style Guide

Blog posts. Styles and themes on Android allow you to separate the details of your app design from the UI structure and behavior, similar to stylesheets in web design. A style is a collection of attributes that specify the appearance for a single View . A style can specify attributes such as font color, font size,

Access Free Android Style Guide

background color, and much more. A theme is a collection of attributes that's applied to an entire app, activity, or view hierarchy—not just an individual view.
