A genogram is structurally similar to a family tree, but serves a very different purpose. A genogram includes information about relationships and interactions between family members, while a family tree only depicts lineage. Imagine a genogram as a family tree with much more detail about how the family members interact with one another. For example, a family tree might show us that "Emily and Kevin are married", while a genogram could tell us that "Emily and Ken are married, but they are ...
